* "RD admit rate" takes [Total admits - early admits] and divides by [Total applications - early applications] -- even though deferred candidates are re-considered in regular and some colleges double-count these candidates in discussing "regular decision admit rate."

Many colleges -- via newsletter or feature in the student newspaper -- did not report ED or regular figures this year

In the "Other information" column -- any demographics are for the **admitted pool**, including available figures on Multicultural (MC), International percentages, breakdown of type of high school
